

Local radio will still prove to be reliable, for one reason. Contest giveaway is a important for local radio. Cable, satellite tv and satellite radio, does no harm to local radio. There should be a choice. Local radio is great, but choice is needed. I spend my summers traveling to Washington state and it is a factor, to have that choice, without choice. I don't waste my XM or Sirius radio to listen to Sean Hannity, I will tune to KERN 1410 AM. When I am out of Bakersfield, Sean Hannity is what I listen to on xm ch 124. I don't have time to play local radio stations. Other groups want to kill the right to choice, all the way. The bad guy, satellite tv, satellite radio and cable tv.

G.P.S. with emergency traffic. I will be upgrading my G.P.S. with traffic info for warnings to traffic delays. Satellite is a quick response to warning me..

Mr. Satellite Tom JR.
